Art Unit: 3632

This is an office action for serial number 10/646,115.

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 93-99 been renumbered 92-98.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 47, 86, 87, 88, and 92 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 6,523,791.

Art Unit: 3632

Although the conflicting claims are not identical, they are not patentably distinct from each other because Patent No. 6,523,791 discloses a first duct-receiving portion (claim 1), a barb (claim 1) comprising an edge (claim 10) a base and two arms (claim 1) , a barb cover (claim 6), a mount (claim 1), a fastener (claim 7), a plurality of barbs (claim 12), no tools (claim 1).

Claims 89-91 and 93-110 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 6,523,791 in view of 6,634,605. 6,523,791 discloses all of the limitations of the claimed invention except for the fastener being threaded. 6,634,605 clearly teaches that it is known to have a fastener being a threaded. It would have been obvious to one having ordinary skill in the art to have modified 6,523,791 to have the fastener being threaded as taught by 6,634,605 for the purpose of providing a stable and secure fastening means.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 47 is rejected under 35 U.S.C. 102(b) as being anticipated by Henneberger 5,316,243. Henneberger discloses

Allowable Subject Matter

The indicated allowability of claims are 49, 50, 56, 68, 69, 73, 74, 78, 79, 83, and 84 are withdrawn in view of the newly discovered reference(s) to Henneberger and Bernard. Rejections based on the newly cited reference(s) follow.
